1 INTRODUCTION AND SCOPE OF COMPETENCY

1.1 Purpose

This document (ATX Codex) is intended to regulate the standards of conduct of the Providers, Partners/Aggregators and Operators when providing Audiotex Lines and their using to promote, offer, order and deliver the Services and pay the fee thereof. It also informs the Customers who buy the Services from the Providers how to use the Audiotex Lines for this purpose and determines the relating procedure of the protection thereof. The ATX Codex further serves Providers, Partners/Aggregators and Operators as a recommended set of rules for the operation of Audiotex Lines in the Czech Republic.

The document was created by the Association of Mobile Network Operators and is based on the experience in the operation of Audiotext Lines in the Czech Republic, including the experience with similar services abroad.

The aim of the document is to define a transparent and also non-discriminatory environment for the provision of services via Audiotex Lines, with an emphasis on consumer protection and the long-term improvement of the reputation of these services on the market.

1.2 Glossary

Audiotex Lines (ATX)	premium-rate lines intended for the operation of content- and voice-based services provided on numbers and number ranges reserved for these services by a valid Numbering Plan
APMS	Association of Mobile Network Operators
ATX Codex	general rules for the provision of services via Audiotex Lines
Customer	end-user calling an Audiotex Line, final consumer of a Service
Czech Telecommunication Office (ČTÚ)	central administrative body for State administration in matters governed by law, including market regulation and the stipulation of terms and conditions for trading in the field of electronic communications and postal services as defined by Act No.127/2005 Coll., on electronic communications and the amendment to related laws
ICTU	Association for Information Technology and Telecommunications
Informational messages	a free of charge automatic message played to the Customer after dialing the Audiotex Line, preceding the actual provision of a paid service.
Numbering Plan	Numbering Plan for public telephone networks, stipulating binding rules for the numbering of public telephone networks and services or access to electronic communications services
Operator	trading entity providing Customers with voice services in the form of a public electronic communications service to allow Customers to call Audiotex Lines
Partner/Aggregator	an entity that, either through its own public communications network or otherwise, shares in the operation and/or provision of Services via Audiotex Lines, but is not directly a Provider
Provider	an entity that provides Services via an Audiotex Line
Services	content- and voice-based services provided via Audiotex Lines
ZoEK	Act No.127/2005 Coll., on electronic communications and the amendment to related laws (Electronic Communications Act), as amended

1.3 Types of Audiotex Lines

The ATX Codex is applicable to Audiotex Lines as defined in the following text.

1.3.1 Structure of numbers used for Audiotex Lines

Audiotex Lines are generally provided on nine-digit numbers in the form: **90X AB CD ZZ**, - where:

- X** determines the nature of Service provided and can have a value from 0-9 in accordance with the Numbering Plan
- AB** determines, in accordance with the Numbering Plan, the price of the Service for the Customer (incl. VAT, should the service in question be subject to VAT) per minute or for one connection
- CD ZZ** is stipulated when a number is allocated by the Czech Telecommunication Office

1.3.2 Audiotex Lines of an informational, content-based, specialist and entertainment nature (non-lottery, non-erotic and non-voting Services)

Services of an informational, content-based, specialist and entertainment nature (e.g. horoscopes, weather, entertainment chat, specialist advice, etc.), whose content must not be in conflict with valid legal regulations of the Czech Republic, may be provided on these lines.

1.3.3 Audiotex Lines of an erotic nature

Services of an erotic nature (see also Sections 2.3 and 5), whose content is not in conflict with the valid legal code of the Czech Republic, may be provided on lines with the dial code 909.

1.3.4 Audiotex Lines of a gambling and lottery nature

Audiotex Lines must not be used for gambling and lottery.

1.3.5 Audiotex Lines of a voting nature

Services may be provided on these lines whereby a Customer participates through voting in a pre-defined competition or survey. Length of call is set by the Provider; it is not possible to use the Service for a longer period than that stipulated by the Provider, Partner/Aggregator or Operator. In the event that this voting service forms part of a television programme, the Provider is obliged to determine in advance whether this is a so-called sudden-impact service (see Section 4.3).

1.3.6 Audiotex Lines with time charges

These are lines on which Services provided are charged to the Customer based on price per time-unit. The following pricing levels are available: 6, 8, 10, 11, 14, 16, 17, 18, 20, 23, 26, 30, 34, 38, 42, 46, 50, 55, 60, 65, 70, 80, 90, 95 CZK/min. Prices are given incl. VAT, should the given service be subject to VAT. The end-price of a Service includes the price of connection and is determined in relation to length of call, price per time-unit, minimum charged length of call and the time interval at which the call is calculated. Provider has to ensure providing of the service in maximum possible call duration calculated from maximum value of transaction 1,200 CZK and used price level.

Example: A call to the Audiotex Line 906 30 1111 lasts 1 minute and 20 seconds, with the minimum charged length of call being 60 seconds and a time interval of 60 seconds for measuring the call. The final price for the Service provided is 60. - CZK.

1.3.7 Audiotex Lines with a one-off charge

These are lines on which Services provided are charged to the customer on a one-off basis per call. The following pricing levels are available: 6, 8, 9, 10, 16, 20, 30, 40, 50, 55, 60, 70, 79, and 95 CZK. Prices are given incl. VAT, should the given service be subject to VAT. The end-price of a Service includes the price of connection.

Example: A call to the Audiotex Line 908 30 1111 lasts 20 seconds. The final price for the Service provided is 30. - CZK.

2 SERVICES PROVIDED ON AUDIOTEX LINES AND CUSTOMER PROTECTION

2.1 General Stipulations

The Provider is obliged to ensure that a Service and its functioning via Audiotex Line are clearly described in all media so that Customers or potential Customers are informed, in a corresponding and true manner, about the Service being offered.

The Provider is obliged to give their contact details in relation to the type of media in question. It is unacceptable to mislead the Customer or potential Customer through unclear language, ambiguity, exaggeration or failure to provide information. It is likewise unacceptable to provide required information illegibly, be it through the use of small, illegible print or a non-contrasting background.

All Providers must ensure that a Service provided on an Audiotex Line conforms to the requirements stipulated by generally binding legal regulations of the Czech Republic and EU law, chiefly with regard to personal data protection and consumer protection. The Provider may not provide data gained through communication with a Customer to a third party (advertising agency etc.) without a Customer's explicit consent.

2.2 Services Provided on Audiotex Lines

When communicating/advertising Services in the media, the Customer must be clearly and unambiguously informed in the relevant advert **of the number dialed, the final price of the Service, including value-added tax and maximum call length (with regards to use of price per minute and the fact that max call duration cannot exceed 1,200 CZK) in minutes (i.e. the call to a number 900951234 with the price per minute of 95 CZK, therefore the maximum call duration is calculated as follows $1,200 / 95 = 12$ minutes), possible automatic call termination if the maximum call price is exceeded** and further facts, as described below.

The Provider of a Service is obliged to retroactively demonstrate this to the Partner/Aggregator or to the Czech Trade Inspection Authority during a check by this authority, as defined in the relevant law.

When promoting information and services provided via electronic means (i.e. in the form of voice, text and visual messages sent through a public electronic communications network), the Provider is obliged to observe all conditions stipulated by the "Act on Some Services in an Information Society and Amendments to Some Laws" No. 480/2004 Coll., as amended, and to chiefly have the consent, demonstrably acquired in advance, of a physical person or legal entity with this form of promotion via electronic means.

2.2.1 Information on type of service according to time-period charged

When advertising a Service, Providers must clearly inform Customers whether it is:

- a classic service, where the length of a call to a specific service is time limited (1,200 / price per minute of an ATX Line);
- a one-off service:
 - o with a fixed time-limit (e.g. 60-second call, terminated by the Provider), or
 - o with a one-off tariff for a single connection.

2.2.2 Information on type of a Service according to price charged per unit

The price for use of a Service must be clearly stipulated so that it is obvious how much it will cost the Customer to utilize the Service. The price is set according to the nature of the Audiotex Line, either as a price:

- o for an applicable time-period, where it is always necessary, with regard to Customer protection, to also give the price of a Service per minute (erotic, informational, etc.), and maximal possible call duration or
- o per call (e.g. voting)

2.2.3 Information on the price of a Service

The Provider must ensure that all Customers using the Provider's services are, under all circumstances, informed about the price of the Service per minute/connection /max call duration (see item 2.2.2 above) in a transparent, clear and comprehensible manner and independent of the manner in which the Service information has been acquired. The prices of the services are always specified by the Provider as the final prices from the point-of-view of the Customer, in CZK incl. VAT, if the given service is subject to VAT, and this fact must be clearly shown if VAT applies.

Written price information must be placed always at the ATX Line of the Service concerned. The font must be always chosen so as to be easily legible, distinct, horizontal and presented in a manner that does not require further investigation - which

means, for example, the scrolling on the website or references to the conditions of the Services located on a different page than the advertisement of the Service, etc.

The font size of the price information must not be smaller than the basic font size used for the service communication and/or respective ATX number.

Spoken pricing information must be clearly audible and distinct and must follow immediately behind the communication of ATX number.

In selected cases, the Provider is obliged to inform of the price of the Service also by means of an informational message (please refer to Article 4.2.1).

2.2.4 Audiotex Information on the Provider, helpdesk, complaints and access

Amongst other things, every Provider must ensure that all users of Services provided by them are informed, in a manner that is clear and comprehensible, and, under all circumstances, independent of the means of gaining information about the service, of:

- the particular number of ATX line - this applies to any advertisement aimed at the Service use
- the Provider – full name and surname (of natural persons) and company name (of legal entities) under which they are listed in the commercial, trade or other register, business address or P.O. Box
- the helpdesk for Customers, chiefly for the purpose of requesting proper tax documents, resolution of complaints and access to the Service.

The Provider is obliged to resolve customer queries and claims without undue delay so that the good name of the Partner/Aggregator and Operator is not damaged. Requests for information and customer complaints are resolved by the Provider at a contact point given in communication with the customer.

In the event that an Audiotex Line is not accessible to Customers on the network of any Operator, then the Provider is obliged to list in an advertisement which Operator networks the Line is accessible in. In the event that an Audiotex Line is accessible from the networks of all Operators, then the provision of this information is not mandatory.

During the Service using the Customer may not be referred to or otherwise redirected to another Audiotex line.

The service Provider is bound to ensure that up-to-date information is maintained as required under this article on the information portal www.platmobilem.cz. The Provider may transfer this duty to their possible Aggregator.

2.2.5 Demonstrative listing of required information in relation to utilized media

Type of Media – Service	Required Information	Example
TV - consultation	- Number of Audiotex Line - Price in CZK/min. incl. VAT and max call duration or max price per call (for calls charged by call) - Full name and surname/trading company of Provider - Contact details for Provider (address or P.O. Box) Information must be clearly legible and must remain on screen for a period of 7 seconds.	Got a problem? Call our customer centre on 906 30 00 00. Calls charged at 30 CZK/min. incl. VAT. Max. call length 40 minutes. Operated by Audix Praha s.r.o. , P.O. Box 1234, Praha 1
TV - voting	- Number of Audiotex Line - Price in CZK/min. incl. VAT and max call duration or max price per call (for calls charged by call) - Full name and surname/trading company of Provider - Contact details for Provider (address or P.O. Box) Information must be clearly legible and must remain on screen for a period of 7 seconds.	To vote in the “Call us” contest, call 906 50 00 00. Max. price of call 50 CZK incl. VAT. Operated by Audix Praha s.r.o., P.O.Box 1234, Praha 1, www.audix.cz

Radio	<ul style="list-style-type: none"> - Number of Audiotex Line - Price in CZK/min. incl. VAT and max call duration or max price per call (for calls charged by call) - Full name and surname/trading company 	Call 906 500 000. 50 CZK incl. VAT per minute. Max call duration is 24 minutes. Operated by Audix Praha.
Other voice-based advertisements	<ul style="list-style-type: none"> - Number of Audiotex Line - Price in CZK/min. incl. VAT and max call duration or max price per call (for calls charged by call) - Full name and surname/trading company 	Call 900 30 00 00, calls charged at 30 CZK incl. VAT per minute, max. call length 40 minutes. Operated by Audix Praha s.r.o., P.O.BOX 1234, Praha 1
Internet / Application for smart phones	<ul style="list-style-type: none"> - Number of Audiotex line - Price in CZK/min incl. VAT and max call duration or max price per call for calls charged by call - Full name and surname/trading company of Provider - Contact details for Provider (address or P.O.Box) <p>The presentation of the contents on the Internet may or may not include a button that opens the phone system window allowing the user to dial the Audiotex Line number</p>	
Press, Billboards, Printed materials, other	<ul style="list-style-type: none"> - Number of Audiotex Line - Price in CZK/min. incl. VAT and max call duration or max price per call (for calls charged by call) - Full name and surname/trading company of Provider - Contact details for Provider (address or P.O. Box) 	Got a problem? Call our customer centre on 906 30 00 00. Calls charged at 30 CZK/min. incl. VAT. Max. call length 40 minutes. Operated by Audix Praha s.r.o., P.O.Box 1234, Praha 1.

Due to Customer protection, the parts highlighted in bold must be included in the text of a message in accordance with the table above.

Where services of a lottery and erotic nature, as well as other services carrying a legal requirement for users to be a minimum 18 years old, are concerned, the following information must be included in all types of media, over and above the examples given above: **“Must be 18 years or older”**.

2.3 Services of an erotic nature

All Services containing eroticism must be properly communicated by the Providers in accordance with the valid legal code of the Czech Republic (for further details, see Appendix no. 1 of the ATX Codex).

Any communication (be it visual, voice-based or otherwise) involving all ‘permitted’ categories of services (or products) with erotic content must contain the warning that the content is intended only for persons older than 18 years of age.

The Provider is fully responsible for proper notification of these Services. The Provider also bears responsibility for any damage and risks involved.

2.4 Services targeted towards youth

Children’s’ services are Services targeted towards the under-15 age group (“children”), e.g. ‘chat’-type services. These Services and all communication related them may not include any content that could harm children or anything that could be used/abused by a child with regard to their mental and moral maturity, or that could be at odds with the valid legal code of the Czech Republic.

3 NUMBER ACTIVATION AND CANCELLATION /SERVICE COMMENCEMENT

3.1 Activation Process for Provider Number in Operator Network

3.1.1 *The activation process for a newly-allocated Provider number is governed by the following procedure:*

- a) The allocation of numbers for Audiotex Lines is governed by rules stipulated by the appropriate state administration body. The number is allocated on the basis of an application by the Provider or Partner/Aggregator;
- b) Following allocation of the number, the Provider applies to the Operator for activation of the number in question in their network, and this either themselves or through the Partner/Aggregator;

Every application for activation of a number allocated for Audiotex Lines must contain chiefly:

- i. Trading company of the Provider
 - ii. Registered address of the Provider
 - iii. Copy of legal authorization from ČTU for use of number allocated
 - iv. Should number access be activated through a Partner/Aggregator, the application must also list the trading company and registered address of the Partner/Aggregator and consent of the Provider to activation
 - v. Contact details of the Provider for the purposes of resolving claims – chiefly the postal address (Provider's registered address or P.O. Box) in the Czech Republic and their telephone of electronic helpdesk for Customers, chiefly for the purposes of requesting proper tax documents
 - vi. Specific description of the activated Service and pre-contract information for the consumer to the extent required by Section 1820 et seq. of the Civil Code.
 - vii. Link to the service web site (or information that the service does not have any website)
Information about the way the service will be promoted
- c) An application for activation of a number must be submitted to an Operator via web interface – www.platmobilem.cz – a minimum 15 calendar days prior to the activation date. The application will be provided to the Operator in the form specified in www.platmobilem.cz and in Appendix 3.
 - d) In the case of activation of an already-existing tariff, and provided that the condition has been fulfilled that the Provider fulfills the above requirements, the Operator will always activate the number for its clients no later than the 1st or 15th day of the month, with the exception of 1st January. Should the day in question not be a working day, then the number can be activated on the next working day.

3.1.2 *The activation process for an Audiotex number migrated between aggregators is governed by the following procedure:*

- a) It is possible to migrate the number of an Audiotex Line only between Operators and Partners/Aggregators operating their own public communication networks in accordance with the ZoEK. Migration of the number of an Audiotex Line means a change in the aggregator/partner or operator through which the service will be operated on the number. At the same time, the original phone number of the Audiotex Line remains applicable. (Note: It is not a phone number migration within the meaning of Sectipn 34 of ZOEK).
- b) Following migration, the same procedure is followed as for the activation process for a newly-allocated number, as per point 3.1.1., where the application is supplemented with information on the network from which the number is to be migrated and also the appropriate procedure as stipulated in General Measures no. 10.
- c) The receiving Operator further ensures via standardized procedure the updating of the relevant reference source for information on migrated numbers. With respect to the technical and operational conditions for the provision of services on Audiotex Lines, it is necessary to set the same date as the activation date for the migrated number as the requested migration date, in accordance with point 3.1.1 d)e).

3.1.3 Available Phone Number Series and Recommended Utilization of Phone Number Series

The available phone number series and the use specification for access codes to the electronic communications services are subject to applicable legal regulations, notably to the Numbering Plan. As of the authorization date of the ATX Code, the applicable notice is the Decree No. 117/2007 Coll., on numbering plans of electronic communications networks and services, with the following classification:

<i>Phone Number Series (90X)</i>	<i>Service Types</i>
900	Voice services – esp. business, specialist, advertisement and competition related services
905	Voice services – a single price for connection
906	Voice services – esp. business, specialist, advertisement and competition related services
908	Voice services – a single price for connection
909	Voice services – adult entertainment services

To ensure a higher predictability and a better protection of the consumer, the use of the following phone number series classification is recommended:

<i>Phone Number Series (90X)</i>	<i>Service Types</i>	<i>Examples</i>
900	Voice services with explicit price – business, specialist and financial services and mediation of employment	Legal, medical and other specialized consultancy services
906	Voice services with explicit price – entertainment Services, marketing (consumer) competitions and telephone games, dating services, advertisement, horoscopes and similar Services	Marketing (consumer) phone competitions and games, lotteries, dating services, advertisement, horoscopes, charging for website access, and similar services
908	Voice services with explicit price – a single price for connection	Marketing (consumer) phone competitions and games, lotteries, charging for website access, and similar services
909	Voice services with explicit price – a single price for connection	Erotic chats and dating services, charging for erotic content

The 905 phone number series isn't technologically supported by all Providers and, for this reason; it isn't subject to regulation under this Code.

If using of the 905 phone number series or the 900, 906, 908, and 909 phone number series in ways other than as recommended by the ATX Code is required, Operators, Partners/Aggregators and Providers shall proceed in compliance with applicable legal regulations and individual contractual stipulation without applying rules under Section 3 of the ATX Code.

3.2 Cancellation Process for Provider number on Operator's network

The standard process for the cancellation of a Provider number is governed by the following procedure:

- a) The Provider requests that the Operator cancel access to an Audiotex Line number in the Operator's given network. The Provider can contact the Operator on the Audiotex Line with a cancellation request either on its own, or an application can be submitted for it by a Partner/Aggregator;
- b) The Provider or Partner/Aggregator are obliged to always request cancellation if their authorization to use an allocated number or to run lotteries (if required by legal regulations) ends, or if they cease to fulfill conditions for trading in electronic communications;
- c) The Operator is obliged to cancel accessibility of the number of an Audiotex Line within the deadline stipulated by contract, but no later than 30 calendar days following submission of the request. Should accessibility have to be

cancelled for any reason as given in letter b), the Operator is to cancel accessibility of the number without due delay once it has learned of this fact;

- d) Should any number of an Audiotex Line be cancelled, or the service is temporarily out of order, then the calling Customer must be informed of such a situation, either through a verbal message or a signal tone (see Section 4.2). the Customer may not be charged for such a service.

3.3 Service Provision Launch (or change of type of the Service provided)

The Partner/Aggregator is obliged to ensure that the Service provided on Audiotex lines is solely a voice content service (i.e. not another product, goods or service) that complies with the limitations set forth in Appendix No. 1 to this ATX Codex and that the maximum price of one call to any Audiotex line does not exceed 1,200 CZK. The Operator may check fulfilment of these limitations (for example by performing mystery shopping) and to immediately terminate operation and availability of a particular Audiotex Line if any of the limitations set forth in the previous sentence may be breached and the Partner/Aggregator does not remedy this state within the period specified in the Operator's call.

Making the Services available to the Customers via the Audiotex Line is carried out through the procedure determined in bilateral agreements with Operators.

The process of enabling Services to Customers is as follows:

- i) The Partner / Aggregator will send to the Operator a request for Service Provision Launch at least 15 days before the scheduled release, in the form specified in the Appendix 3 to this Code of Conduct;
- ii) the Operator shall decide within 10 days from obtaining the Service Provision Launch request;
- iii) In the Operator does not express its opinion within the set deadline, the application shall be considered as rejected;

A **change** of the Service without the consent of the Operators is considered a great violation of the Code and the Operator is entitled to immediately terminate the routing of the Audiotex line used to make such a Service available.

If there is any change in the service provided (including but not limited to a change in the mechanics of the activated service), the Partner/Aggregator sends a request to the Operator by e-mail, to the same extent and in the same manner as when a new service is activated pursuant to 3.1.1.

4 OTHER

4.1 Operators' reserved rights

The Operators and Partners/Aggregators associated in APMS and ICTU may, at any time, alter this ATX Codex, chiefly so that it is in accordance with the valid legal code of the Czech Republic and other professional codices.

Based on an agreement with the customer (e.g. in General Business Terms and Conditions or in the Price List), Operators may introduce additional maximum financial limits per call or a sum of payments by means of any premium service (PR SMS/MMS, Audiotex Line and payment by means of the Operator's mobile payment gate, for example m-platba or M-peněžanka) from a telephone number for a specified period (month or year); in such a case, the Customer will not be allowed to call an Audiotex Line over the limit (i.e. once the limit is reached, the call will be terminated and no other call will be allowed).

4.2 Informational messages

The originating Operator (operator in whose network the customer initiates the call), the Provider or Partner/Aggregator is authorized to set a free, informational voice message, to be played prior to connection to an Audiotex Line, drawing Customers' attention to the price of the Service provided on the number called. The message must not be discriminatory, i.e. it may not be different for different Operators, Providers or partners/Aggregators, preferring one type of connection over another.

All messages are to be primarily in the Czech language. Versions are allowed in other languages as long as the Czech version is always played first.

4.2.1 Required Informational messages

Beyond the rules of the transparent sale set forth in Chapter 2, with respect to services provided via 900 and 906 phone number series, the Provider or the Partner/Aggregator is required to always ensure that the Customer is notified of the cost of the Service provided under the dialed number, and this by means of a free-of-charge informational message and before the connection to the Audiotex Line is established.

The duty under the preceding article shall not apply to the following groups of services:

- Business and expert services (excluding financial services, financial service mediation, financial consultancy, and providing or mediation of employment);
- Phone competitions and games;
- Advertisement orders;
- Dating services;
- Horoscopes and esoteric services.

4.3 Sudden-impact activities

These are activities carried out by the Provider or Partners/Aggregators where there is good reason to suppose that their realization will lead to increased, sudden-impact use of an Audiotex Line within a limited time-period, leading to greater demands being placed on Operators' telephone networks than usual within a certain time-frame. Such sudden-impact use of Audiotex Lines by Customers is considered to occur when the number of calls to an Audiotex Line exceeds 10,000 calls per hour. This chiefly concerns use of Audiotex Lines for television contests and voting etc. The Provider is obliged to declare these activities to Operators no less than 14 days prior to planned realization via a form, attached as Appendix no. 2 of this Codex.

4.4 Accordance with the valid legal code

All Providers and Partners/Aggregators must ensure that Services offered and operated by them or their contractual partners are provided in accordance with the valid legal code of the Czech Republic, and chiefly with legal regulations governing the protection of intellectual property (regulations governing handling of published works, protected trademarks, patents and

utility models), protection of personal data, protection against dispatch of unsolicited commercial messages, consumer protection and in the case of lotteries or other similar games, also in accordance with the law on lotteries, the approved and valid Gambling Code and, last but not least, protection of youth (Services of an erotic nature).

In the event of any kind of dispute, including potential ones, related to the breach of the valid legal code or in the event that any Operator learns of the suspicion of a breach of the valid legal code while providing Services via Audiotex Lines, then the provider or Partner/Aggregator may, following prior warning, suffer suspension of the possibility of using these services on the Operator's network.

5 APPENDIX NO. 1 - DEFINITION OF BANNED SERVICES AND RULES FOR THE PROVISION OF EROTIC SERVICES

5.1 Recommendations for the provision of services

Providers of content are obliged to act in accordance with instructions of operators and Partners/Aggregators associated in APMS and ICTU. Should there be a breach on the part of the Provider, Operators and Partners/Aggregators associated in APMS and ICTU are authorized to initiate appropriate steps towards a correction of the situation, or act in accordance with valid contracts with providers, and this in accordance with the valid legal code of the Czech Republic.

5.2 Banned content of services

5.2.1 Conditions for running lotteries

ATX may not be used in connection with running lotteries or other gambling services which are violating the law.

5.2.2 Services of a misleading and deceptive nature

It is not permitted to provide on Audiotex Lines the following services, which are clearly intended to artificially increase turnover, whose content clearly does not correspond to the price asked, or services designed to harm the justified interests of the customer. This chiefly, but in no way exclusively, concerns:

- a) automatic dialer (calling shows signs of time progression, mathematical series etc.),
- b) services redirecting the call to other numbers,
- c) repeated messages, circular IVR,
- d) silence,
- e) clearly out-of-date/unnecessary messages,
- f) nonsensical content, sounds,
- g) clearly artificial extension of length of connection prior to gaining of the required information (superfluous IVR sections etc.)

5.2.3 Banned erotic content

This field further contains everything that is in violation of generally binding legal regulations of the Czech Republic or good morals in a general sense. It chiefly concerns the following:

- a) services suggesting the idea of sex with minors (less than 18 years old), or with a person clearly presenting themselves as one younger than 18 years,
- b) sex with direct relatives or siblings (e.g. mother and son, brother and sister),
- c) an offer to trade in people with the aim of sexual relations,
- d) services suggesting the idea of sexual relations with animals (i.e., for example, touching or other sexual activities involving a human + animal combination),
- e) torture and violence (carried out against the will of persons depicted; this includes all forms of sadomasochistic practice that could end in injury with serious consequences to one's health),
- f) sadomasochistic (SM) practices will be assessed individually, although it can be generally assumed that should SM be concerned with humiliation (i.e. sexual practices involving binding), then this content will be considered illegal.
- g) masturbation on human remains (and their desecration) and genocide (racially-motivated sexual or other humiliation of persons depicted),
- h) depiction of human excretions in connection with sexuality (e.g. description of urine and stools, blood etc.), associations with weapons, drugs, alcohol given to minors, murder, rape, dealing in hostages and further criminal offences connected with the sexual content offered

5.2.4 Offering, mediation, provisioning and management of credits and loans

On the Audiotex Lines it is not permitted to provide any services or information that are associated with any of the following activities:

offering, mediation or provision of credits or loans, administration of credits or loans, including provision of information about their balance, fulfilment or security and relating counselling, and the conclusion, modification or termination of credit or loan agreements, incl. counselling in this respect, as well as certification, assessment of creditworthiness, rating, credibility, trustworthiness, reliability, authenticity and all types of consultation or assessment of consumers and users of the services.
